Writing a survey.

What is a survey?

A survey is a method of gathering information from a sample of people, with the intention of generalizing the results to a larger population. Surveys provide a source of data for whoever needs that particular information.

Let's check an example of survey in the following link:

<https://www.surveymonkey.com/mp/diet-exercise-survey-template/>

Now let's check some tips to write a survey:

1. **Use formatting.** Group similar questions to keep your survey logical and focused.
2. **Be brief.** Respondents really don't like surveys that are too long. So when you're thinking about how to make a survey, just remember to minimize the number of questions you ask.
3. **Stick to specifics.** Create survey questions that explore one idea at a time to make sure your respondents can understand what you're asking.
4. **Clarify, clarify, clarify.** Spell out everything that could be interpreted in more than one way.
5. **Keep it relevant.** Create a survey that keeps respondents focused by only showing them questions that directly apply to them.

Now, before we move on to the activity we need to go through a brief review of 'Wh' questions.

If you'd like to make a **'wh' question**, you just put the question word at the front:

Wh Questions

where	am I ?
what	are you ?
why	is he ?
who	is she ?
when	are we ?
how	are they ?

Now the ACTIVITY.

You will have to write a short survey related to free time activities and write the answers you get. You have to use 'Wh' questions, you have to write full answers not just yes/no answer.

Example: what is the app you use the most on your free time? – I always use Instagram.

1. Questions: Write a five questions survey related to free time activities using 'Wh' questions (2pts each, 10pts total)
2. Answers: Ask the survey on 3 different classmates or people from school and write the answers (10pts each classmate, 30pts total).
